EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.56/10.0

Vellore, India

Sep 2023 – May 2027

TECHNICAL SKILLS

AI & LLM Stack	Python, Prompt Engineering, Conversational AI, Voice Agents, LLM APIs, Function Calling / Tool Use, RAG Pipelines, Speech-to-Text (STT) / Text-to-Speech (TTS)
Languages & Web	Python, Java, JavaScript, TypeScript, SQL, HTML/CSS
Backend & Frameworks	Spring Boot, FastAPI, REST APIs, React, Next.js, Node.js, Dynamic Guardrails
Databases & Cloud	PostgreSQL, MySQL, Cloudflare Workers, Docker, Render, Vercel, Git/GitHub
Core CS Fundamentals	Data Structures & Algorithms, OOP, System Design, Operating Systems, DBMS

WORK EXPERIENCE

Indian Council of Agricultural Research – IISWC | *Forward Deployed Engineering Intern*

Dehradun, India

Tech Stack: Python, Java, Spring Boot, React, REST APIs, Rule Engines, Domain Logic

Dec 2025 – Jan 2026

- Partnered directly with domain scientists to translate complex agricultural workflows into structured algorithmic logic, serving as lead forward-deployed developer for client workflow integration.
- Engineered a **3-stage automated decision logic engine** processing multi-source inputs to validate environmental constraints, **reducing manual assessment processing time by 95%** (from hours to minutes).
- Architected and deployed an ICAR-aligned **Soil & Water Decision Support System (DSS)**, integrating dynamic geospatial parameters with backend REST APIs to trigger real-time mitigation workflows.
- Built responsive researcher dashboards with dynamic guardrails and input validation, enabling zero-friction parameter collection and visual output verification.

PROJECTS

Real-Estate Voice & Sales AI Agent | *Autonomous Lead Qualification Engine* [GitHub]

Jul 2026 – Aug 2026

Tech Stack: Python, LLM APIs, Function Calling, STT/TTS Pipelines, Webhooks, REST APIs

AI Engineer

- Designed and deployed an **end-to-end Voice AI sales agent** capable of executing real-time inbound/outbound sales conversations, property Q&A, and buyer intent qualification.
- Configured custom conversation flows, system prompts, and strict guardrails to prevent hallucinated pricing/property details while dynamically retrieving catalog data via API function calls.
- Implemented speech-to-text (STT) and text-to-speech (TTS) integration pipelines, evaluating conversation logs to rapidly patch failure modes and improve intent detection accuracy.

SpendSnap | *AI-Powered Expense & Document Parser* [GitHub]

Jun 2026 – Jul 2026

Tech Stack: React, TypeScript, Java 21, Spring Boot, PostgreSQL, Tesseract.js, Docker, Render

Full Stack Developer

- Built a Progressive Web App (PWA) incorporating **NLP bank SMS parsing and OCR vision models** (Tesseract.js) to automatically extract structured transactional entities from raw unstructured inputs.
- Secured platform infrastructure using OAuth 2.0 with persistent session middleware and real-time state sync, deployed across Cloudflare Workers, Render, and Neon DB.
- Built automated test suites covering 32 integration scenarios to guarantee endpoint reliability and low-latency payload parsing.

StockPilot | *AI-Assisted Stock Research Dashboard* [GitHub]

Mar 2026 – May 2026

Tech Stack: Next.js, React, TypeScript, JWT, Async REST APIs, Tailwind CSS, Vercel

Frontend Developer

- Constructed high-throughput research analytics frontend featuring asynchronous polling systems to visualize automated back-testing algorithms across multi-year data horizons.
- Integrated custom user analytics, state management, and optimized client bundle load speed via Next.js compiler settings.

CERTIFICATIONS

- ServiceNow Virtual Internship Program** – SmartBridge / AICTE (Agentic AI & Automated Test Frameworks) (Jul 2026)
